Subject: 2nd Incomplete Letters

Good Afternoon,

We are making every effort to assist counties with the volume of records in your incomplete queue, as well as ensuring that voter records are properly updated in accordance with federal and state law.

In light of these considerations, we recently completed an analysis of the records in your incomplete queue and have determined that it may be possible for you to process some of the incomplete DMV registrations. If you have not yet mailed your incomplete notices, please delay sending them out until further notice.

We will let you know as soon as possible which registrations can be processed without waiting for a signature from the voter.

Please understand that we know that the timing of this information is not ideal, but thinking long-term, these changes will be in the best interest of our voters and will have a positive impact on our overall processes.

Veronica
